Banking Transformation

What are we facing now?

Due to the impact of internet finance, interest rate liberalization, and the influence of the slow-down in profit growth of the banking industry, global banks starts to put smart self-service devices to achieve lighter, smarter, and more experience-based bank outlets to release human capital, improve efficiency and customer experience, and overall bank integrated operations.

What are we providing now?

SNBC combines its own experience and key module development capabilities in the financial industry to provide a series of integrated solutions for non-cash, cash and intelligent network management and control platform systems for bank outlets.

Solution Functions

Using the smart banking solution provided by SNBC, the bank outlets can transfer more than 90% of the traditional non-cash and cash business of the counter to the self-service equipment.
